Wastewater Treatment Enzyme

BK - PARTNER

USES

Improves water quality, reduces BOD, COD and pollution indicators. Limits foam in aeration tanks. Increases microorganisms and promotes beneficial bacteria. Prevents and decomposes filamentous fungi and actinomycetes. Improves sludge settling and eliminates odors.

USAGE

Dilute with clean water at the ratio

Spray or pump into wastewater treatment tanks, water storage tanks, septic tanks, and self-

Dilution
Example: **1 - 10 ml / 700L -**

Frequency: Once per day or every 2–3 days.

Enzyme for Fat/Oil Treatment

BK - OILBUSTER

USES

Removes fats, oils, and BOD in wastewater. Breaks down and prevents residue buildup, limiting solidification. Improves tank efficiency and reduces cleaning costs. Effectively cleans and deodorizes surfaces.

USAGE

Dilute with clean water at the ratio

Spray or pump into the wastewater treatment tank.

Dilution
Example: **10 ml - 20 ml /**

Frequency: Once per day or every 2–3 days.

Deodorizing Enzyme

NIOI ZERO

USES

Improves air quanlity, treats odors from livestock farms, landfills, drainage systems, wastewater, and industrial areas; reduces pollution,improves livestock living conditions, and processes organic waste and animal carcasses into fertilizer meeting Japanese standards.

CÁCH SỬ DỤNG

Dilute with clean water at the ratio

Pray evenly into polluted environment or Livestock facilities

Dutition 1000 - 2000 time
Ví dụ: 10ml / 20L - 40L

Frequency:1-2 time/ week

INGREDIENTS:

Water, protein, amino acids, vitamins, minerals, organic acids.

Unlike air fresheners or odor-masking agents, it quickly reacts with organic substances that cause foul odors through catalytic chain reactions and the decomposition activity of multiple enzymes, eliminating and preventing the formation of foul odors (harmful gases).

In addition, it stimulates beneficial bacteria in the area, accelerating the decomposition of organic matter (biological deodorization method).

It also helps eliminate foul odors (harmful gases) in the air through enzyme-based oxidative deodorization reactions.

Biso Enzyme is derived from natural yeast, does not cause irritation, and contains no known allergens, making it safe and harmless when in contact with the human body.

The product is 100% biodegradable and does not contain bacteria, therefore it does not harm the ecosystem and can be used easily and safely anywhere.
