Enzyme for Flower Bud Differentiation

MITAKA3000

USES

Increases crop yield, promotes flower bud differentiation, and provides nutrients that enhance flowering and fruit set while improving the quality of agricultural products.

HOW TO USE

Dilute with clean water according to the specified ratio

Soil irrigation:
Dilute 300 ~ 500 times
Exp: 1L / 300L ~ 500L

Use once during flowering and fruit-setting stage.

ORGANIC ENZYME

SP 10-15-20

USES

Increases crop yield, enhances **Brix sweetness** and flavor of fruits. Helps plants grow strong and protects crops from pests, diseases, and unfavorable environmental conditions. Provides essential nutrients for plants.

HOW TO USE

Dilute with clean water according to the specified ratio

Soil irrigation:
Dilute 300 ~ 500 times
Exp: 1L / 300L ~ 500L

Foliar spray:
Dilute 300–500 times.
Example: 1L / 300L – 500L water.

Can be used as a fertilizer substitute.

Frequency: Once per month.

Soil Improvement Enzyme

DAICHI NO TOMO

USES

Treats fungal diseases and nematodes, removes heavy metals, improves nutrient absorption, increases plant resistance, enhances soil quality, and activates beneficial microorganisms in the soil. Detoxifies soil and organic toxins.

HOW TO USE

Dilute with clean water according to the specified ratio

Soil irrigation:
Dilute 2000 times
Exp: 100ml / 200L

Foliar spray :
Dilute 2000-2500 times
Exp : 100ml / 200L ~ 250L

Frequency: Once per month.

ORGANIC NUTRIENT ENZYME

DAICHI NO TOMO 500

USES

Treats root rot and restores the root system. Helps overcome yellowing leaves and weak plants, promotes fast shoot growth, greener leaves, and increased flowering. Provides essential nutrients, boosts plant immunity, and supports strong plant development.

HOW TO USE

Dilute with clean water according to the specified ratio

Foliar spray :
Dilute 300 ~ 500 times
Exp: 100ml / 30L ~ 50L
1L / 300L ~ 500L

Có thể kết hợp với DAICHI NO TOMO tưới đất

Can be used as a fertilizer substitute.
Frequency: Once per month.

TREAT DISEASES ENZYME

MITAKA1000

USES

Supplement vitamins and minerals, promote metabolic processes, and produce green, glossy leaves. Treat fungal diseases, mites, thrips, and fruit flies; prevent and repel pests and harmful insects. Protect fruits and prevent fruit rot.

HOW TO USE

Dilute with clean water according to the specified ratio

Foliar spray :
Dilute 1000-2000 times
Exp: 100ml / 100L ~ 200L

Có thể kết hợp với DAICHI NO TOMO phun trên lá

Frequency: Once per month.
